Eyal Hefer

Computer Science Student | Ben-Gurion University of the Negev
Phone 052-5661890 | Email hefereyal@gmail.com

Resourceful Computer Science student combining deep algorithmic understanding with practical project experience in modern software architectures, ready to contribute technical rigor and fresh perspectives to innovative engineering challenges.

Education

B.Sc. in Computer Science with a specialization in Management | Ben-Gurion University of the Negev | Expected Graduation: Spring 2027.

Relevant Courses: Introduction to Computer Science (90), Data Structures (83), Algorithm Design (91) | GPA: 83

Academic Projects

Data Management Mini-Project | Analyzed and implemented complex "cherry-picking" algorithms based on theoretical research from an academic paper. Successfully converted advanced data management concepts into efficient code, demonstrating high-level problem-solving and independent research skills.

Concurrent & Distributed Systems (Java) | Designed and implemented multi-threaded and microservices-based systems in Java, focusing on **concurrency, synchronization and asynchronous inter-service communication.** Built message-driven architectures coordinating independent components, applying **object-oriented design** and clean code principles. Managed development using **Git and Github.**

System Programming & OS Labs (C, Linux) | Developed low-level programs in **C on Linux**, working with **processes, memory management, system calls, and ELF binaries**.

Emergency Risk Prediction System – MDA Data (Python)| Developed a **data analysis and risk-prediction pipeline** in **python**, processing real-world emergency datasets. Integrated the analysis layer with a **Base44 frontend via REST APIs** and containerized components using **Docker.**

Professional Experience

Algorithm Design Course Mentor | 2025 - present | Mentor two students for a total of 4 Hours per week
- Selected by the university to serve as a course mentor based on a high course grade (91).
- Strengthened my ability to explain complex algorithmic concepts and improved my algorithmic problem-solving skills.

Pre-Academic Preparatory Program | Ben-Gurion University of the Negev | Achieved a score of 96 in Mathematics and 97 in Physics (5 “Bagrut” units each).

Israel Electric Corporation Technical Customer Service Representative | April 2021 – June 2022
- Developed strong interpersonal communication skills and real-time problem-solving abilities.

Military Service

IDF – Combat Engineering Corps | Combat soldier and commander | March 2018 – November 2020
- Full combat service including a commanding role.
- Active reservist during the “Iron Swords” war.
